

KickXPro: What Can Be Implemented Right Now

Purpose

This document outlines the highest-priority features that can be implemented immediately in KickXPro using the current application structure.

1. What already exists in the structure

Authentication

- Register as Coach or Player
- Login
- Role-based redirection

Coach Portal

- Dashboard
- Roster
- Sessions
- Player Evaluation
- Match IQ (future / mocked)
- Earnings (visible / mocked)

Player Portal

- Dashboard
 - Discipline
 - Match IQ (future / mocked)
-

2. Best features to implement right now

These are the fastest, highest-value additions that fit the existing structure.

A. Team / Batch Mapping

Why: Needed for both individual coaches and larger academies.

What to add: - Create teams or batches - Assign players to a batch - Assign coaches to one or more batches
- Let academy admin view all batches

Simple screens: - Coach Portal > Roster > Batch Selector - Admin View > Team Management

B. Session RSVP / Availability

Why: Coaches need to know who is coming before practice.

What to add: - Player can mark: Going / Not Going / Late - Coach can see expected attendance before session - Optional reminder before session

Simple screens: - Coach Portal > Sessions > View Responses - Player Portal > Dashboard > Upcoming Session > Respond

C. Attendance Tracking Improvements

Why: Attendance is already part of the structure and should become more useful.

What to add: - Show present / late / absent history by date - Show streaks - Show attendance percentage - Let players and parents see missed/present dates clearly

Simple screens: - Coach Portal > Sessions > Mark Attendance - Player Portal > Discipline > Attendance Timeline

D. Quick Evaluation System

Why: This is one of the strongest core features already present.

What to add right now: - Rate 4 to 6 key skills only - Add 1 strength - Add 1 improvement area - Add 1 short coach note - Save evaluation after each session

Suggested MVP skill categories: - Technical - Tactical - Physical - Communication - Discipline - Confidence

E. Goal Tracking

Why: Players need clear next steps, not just ratings.

What to add: - Coach assigns 1 to 3 active goals - Player marks progress - Coach can close or update goal

Goal types: - Technical goal - Physical goal - Tactical goal - Discipline goal

Simple screens: - Player Portal > Dashboard > Active Goals - Coach Portal > Evaluate > Assign Goal

F. Player Self-Reflection

Why: Simple and valuable without much build complexity.

What to add: - After a session, player answers: - Effort today - Confidence today - What went well? - What should improve?

Simple screens: - Player Portal > After Session Check-in

G. Messaging / Updates

Why: Coaches and academies need clean communication.

What to add first: - Coach to team announcement - Coach to individual player note - Session reminder template - Missed session follow-up template

Keep MVP simple: - In-app notifications - Optional WhatsApp deep link - No full chat system initially

H. Parent / Guardian View

Why: Important for youth academies and fee collection.

What to add: - View player attendance - View latest coach note - View upcoming sessions - View fee status - RSVP on behalf of child

Simple screens: - Parent mini-dashboard

I. Fee Tracking

Why: Direct business value for coaches and academies.

What to add: - Paid / Pending / Overdue status - Monthly fee due date - Reminder flag - Payment history view

Keep MVP simple: - No full accounting - Only fee status and reminder workflow

J. Selection / Squad Status

Why: Serious players want to know where they stand.

What to add: - Training squad - Match squad - Watchlist - Starter - Injured / unavailable

Coach controls: - public note to player - private internal note

3. Features to postpone for later

These should not be top priority right now.

Later Features

- Full Match IQ system
 - Advanced tactical analytics
 - Complex earnings and finance dashboard
 - Large badge / gamification systems
 - Full video analysis suite
 - Full academy ERP-style administration
-

4. Recommended MVP flow

Coach Flow

1. Login
2. Select batch/team
3. Create session
4. Check RSVPs
5. Mark attendance
6. Quick-evaluate players
7. Assign goals
8. Send summary/update

Player Flow

1. Login
2. View upcoming session
3. RSVP
4. Attend session
5. View evaluation
6. View active goals
7. Submit self-reflection

Parent Flow

1. View upcoming sessions
 2. RSVP for child
 3. Check attendance and latest coach note
 4. Check fee status
-

5. Recommended implementation phases

Phase 1: Immediate

- Team / batch mapping
- RSVP / availability
- Better attendance history
- Quick evaluation improvements
- Goal tracking

Phase 2: Very Soon After

- Messaging / reminders
- Parent view
- Fee tracking
- Player self-reflection

Phase 3: Premium / Advanced

- Video clip feedback
 - Match IQ
 - Academy-wide reports
 - Selection analytics
-

6. Most practical database additions

Suggested tables

- academies
 - teams
 - team_coaches
 - team_players
 - sessions
 - session_responses
 - attendance_logs
 - evaluations
 - goals
 - player_checkins
 - guardian_links
 - fee_status
 - player_status
-

7. What gives the most value fastest

Highest-value / lowest-complexity wins

1. RSVP before session
 2. Team / batch mapping
 3. Attendance history by date
 4. Quick evaluation with short notes
 5. Goal tracking
 6. Fee status tracking
-

8. Final recommendation

If KickXPro wants to become useful immediately for coaches and academies, the fastest winning version is:

Team mapping + Session RSVP + Attendance + Quick Evaluation + Goals + Parent/Fee visibility

That creates a complete weekly operating loop without building complex analytics too early.
